

Oleodinamica 2MP ES1000203 CETOP 5 connection end plate

Manufacturer: Oleodinamica 2MP
Manufacturer part number / published order designation: ES1000203
Published model: ES1000203

About this compilation

Prepared by Hydmaster from selected manufacturer documentation. Original technical pages follow without cropped drawings, rewritten data or altered units. This cover and index are Hydmaster editorial material, not a manufacturer-issued exact-execution datasheet.

Coverage: selected pages relevant to the identified size and configuration. Other options or neighbouring models retained on an original page apply only where explicitly identified.

Execution notes and conditions

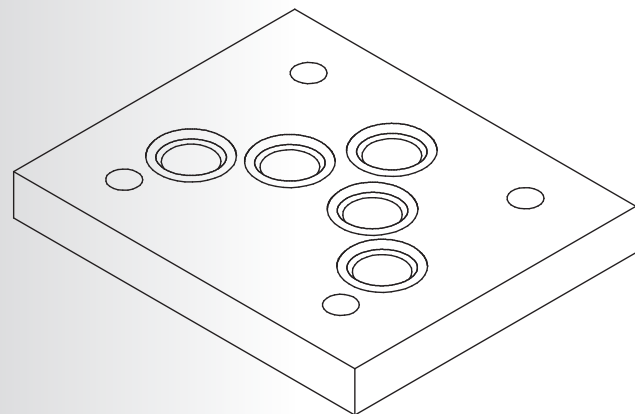

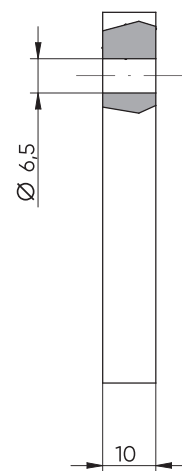

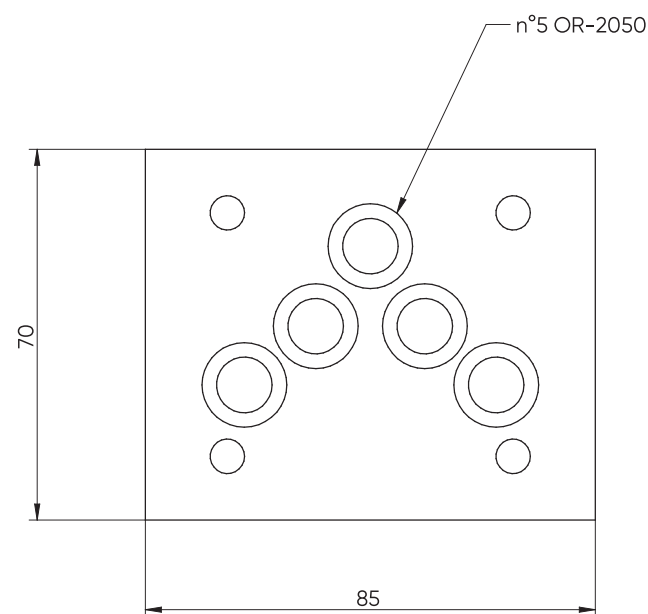

The actual selected supplier card links manufacturer number ES1000203 to display designation ES 10-00-20-3. The factory sheet prints an ordering legend rather than an individual complete-code row. Only the observed steel S field and 20 end/sub-plate design with observed diagram 3 are reconciled; no other execution has been generated. Only printed 11.4 circuit 3 applies. No verified working-pressure, flow or supplied-seal claim.

Source-page index

Source page numbers below are physical pages of each complete original PDF. The original printed page labels and technical content remain unchanged. Compiled page numbers count this cover/index.

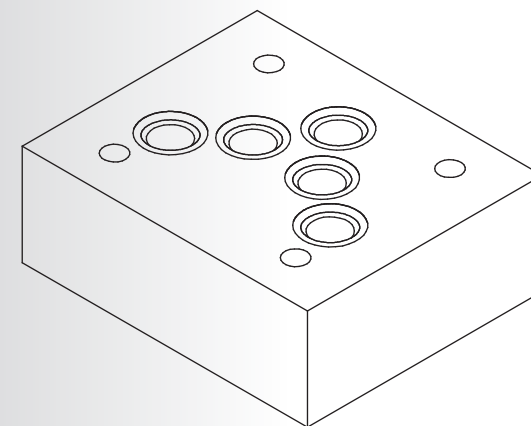

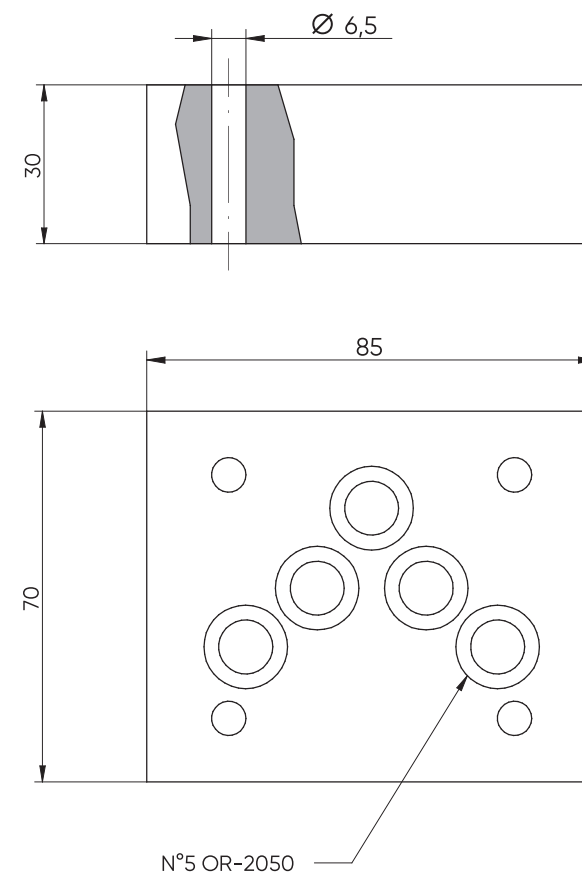

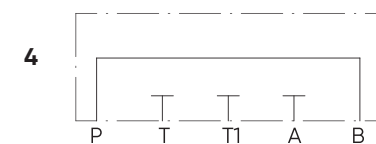

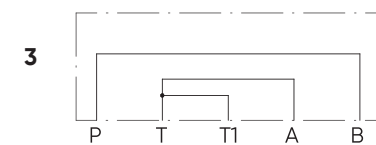

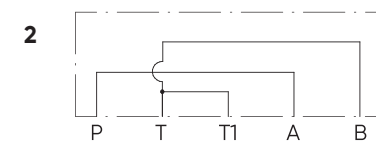

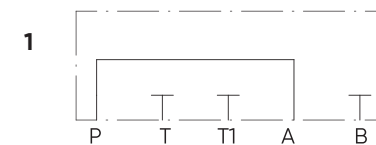

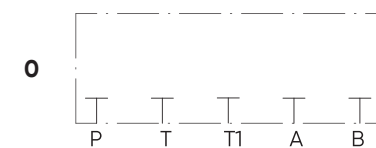

Source A: Original current manufacturer matching plate section, ordering legend and selected circuit diagram.

Original pages	Compiled pages	Relevant content
49	2	Original current manufacturer matching plate section, ordering legend and selected circuit diagram.
