

Naldoni e Biondi NBSN120L weld-on spherical cylinder end

Manufacturer: Naldoni e Biondi
Manufacturer part number / published order designation: NBSN120L
Published model: NBSN120L

About this compilation

Prepared by Hydmaster from selected manufacturer documentation. Original technical pages follow without cropped drawings, rewritten data or altered units. This cover and index are Hydmaster editorial material, not a manufacturer-issued exact-execution datasheet.

Coverage: selected pages relevant to the identified size and configuration. Other options or neighbouring models retained on an original page apply only where explicitly identified.

Execution notes and conditions

The exact manufacturer designation is matched to the selected supplier MPN and its own stock-model dimensional row. The original section shows a complete spherical-bearing insert inside the housing, not a bare eye or loose insert. The supplier brand is absent (--); the listing proves an offered catalogue designation, not independent authentication of an individual supplied unit.

Naldoni e Biondi NBSN120L is a complete SN-L spherical joint end for weld-on cylinder rear-end mounting. The manufacturer section shows the spherical bearing insert inside its housing, and the selected supplier lists the component as a weldable cylinder end. It is not a bare fixed eye or a separate unmounted bearing.

All articles in this batch are documented as lubricatable. Production-material wording does not establish a separate bearing-insert grade. No ununitized Cda or supplier-only static load, pressure, welded-assembly capacity or welding-procedure rating is assigned. The genuine family photograph is representative and does not certify dimensions, lubrication hardware or supplied revision.

On request on a minimum batch, as marked by the current catalogue. No current stock or delivery claim.

Exact row asterisk means Pantographed in the current manufacturer legend. It is not a lubrication exception or an alternate ordering suffix.

The actual article remains NBSN120L. Its original manufacturer row, selected supplier header and stock-model table all state 125 mm for dimensions A and B. These dimensions come from those matched sources, not from the number 120 in the article code. No NBSN125L alias or replacement compatibility is asserted.

Source-page index

Source page numbers below are physical pages of each complete original PDF. The original printed page labels and technical content remain unchanged. Compiled page numbers count this cover/index.

Source A: Complete relevant original page with exact row, sphericalinsert section and material/lubrication notes

Original pages	Compiled pages	Relevant content
117	2	Complete relevant original page with exact row, sphericalinsert section and material/lubrication notes

> **Materiale di produzione:** Acciaio S355
